About me

A web developer with over 4.5 years of experience in implementation, testing and deployment of large web applications. A strong understanding and working knowledge of front-end frameworks such as Angular, React and Web APIs. Adept at collaborating with clients and working in cross functional teams to develop end-to-end products. Proactive and structured with a drive for innovation.

Relevant Experience

Web developer, Inmation AspenTech, Eindhoven

OCTOBER 2021 — PRESENT

- Work with a small team of web developers to build a modular and flexible web application framework that can be designed by the users according to their requirements.
- Work with front-end technologies and languages such as **React, TypeScript, MobX, Cypress, Git** etc.
- Continuous testing of the features developed.

Software developer, Infosys Limited, Chennai

JUNE 2018 — SEPTEMBER 2021

- Write modern and robust code for a diverse set of client and internal projects using latest versions of **Angular, React.JS, .NET framework and MySQL**.
- Work in an agile friendly environment where communication and collaboration with multi-disciplinary teams of engineers, designers, producers, clients, and stakeholders were done on a daily basis.
- Underwent training in **Python, PHP, Linux OS** as a system engineer trainee for four months.
